Hi Bob,

What nice guys you have working with you!!! They were great and did a wonderful job....I did not know what to expect and was astounded by what I saw.

They are neat and cleaned up my cellar and the foam with the paint (I know it is not paint but looks like paint) really brightens up the cellar. Now I have Augusta Fuel coming Monday to check on my thermostat and a radiator that is not working upstairs and then I hope to see a difference in the warmth of the house.

You mentioned the wall plug insulators and I would like to order from you (that way I know I will be getting the best ones for the heat loss) the following which you can add to the bill. Please let me know if you want me to pick them up.

25 regular two plug outlets

1 outlet in the kitchen that is configured like this: it is rectangular with the GFI on the left and one regular light switch on the right

1 outlet in the kitchen that is configured like this: it is rectangular with two regular light switches on the left and the GFI on the right

Bob, thank you again for your assistance with this process and I will submit the invoice and form to Energy Maine and keep my fingers crossed. Again, see you in the spring with the roof and the support post in the cellar that needs to be
