Spray Foam of Maine used them for my project this week will definitely recommend them and already working with them on my next project!! Did a great Job insulating my building they were very professional from start to finish went back and fourth on what I thought I wanted but they were very helpful and patient until I decided exactly what I wanted. The two man crew that came to my house were great, went over the contract page by page made sure I understood it and everything was correct before I signed, they left the Job site as clean as it was and did a great Job on the actual Spray Foam application very Happy with the results!!! So smooth looking I may just paint over the walls and call it a day!! Well worth the money!!!!
